

Healthcare Performance Group

## **Assessment Services**

Expert assessments and recommendations to optimize workflow design and build support for seamless Cerner® integration across the care continuum.

Integrate. Optimize. Perform.

## Trusted Expertise

As the leading experts on the power of Cerner, we understand its complex workflows, designs and builds. Our Assessment Services ensure you are well-prepared for the most current healthcare technology and well-positioned to achieve maximum value from it.

### Primary Benefits

- HPG Assessments can proactively identify quick fixes and long-term solutions for improved user experiences.
- Improved user experiences foster enthusiastic adoption, which is essential for realizing the full benefits of your system.
- Easy, time-saving workflow strategies and design edits build momentum and secure buy-in to successfully take on larger optimization efforts.

# Ensuring Your Success

Developing a comprehensive plan for best practices starts with evaluating your Cerner build, design and user workflow to identify stop gaps, breaks and areas of inefficiencies. From there, we will work with key stakeholders to review our findings and discuss health system objectives. We then provide expert recommendations to better manage workflow, staff productivity and resource reallocation to align with your business objectives and goals for improved patient care.

## Customer-Focused Team Approach

Through our network of 100+ consultants working with thousands of Cerner users across the country, you can rest assured we stay up to date on the latest trends. We are not sponsored by or affiliated with Cerner Corporation, so we offer an unmatched level of independence that enables us to customize plans and builds, detect potential conflicts, and provide proactive solutions for a seamless experience from start to finish.

Working alongside you, we transform complexities into opportunities by determining best practice options, calculating return on investment, developing budgets, mapping workflow advantages, adapting to regulatory changes and more.

**We deliver expert solutions to drive stronger performance and better outcomes.**

# Comprehensive Solutions

Through our comprehensive assessments and collaborative approach, we uncover solutions to many common EHR-related challenges, including:

- Clinician buy-in
- Limited internal resources
- Limited Cerner capacity
- Resistance to change
- Integration with current technology
- Technology necessary to report quality of care
- Cost of continuous training

## The Partner You Need

Ask yourself: Do your physician requests for your EHR relate back to your build and require significant changes to resolve? Do your key stakeholders request changes based on new information from CHC or other Cerner marketing forums? Does your IT staff have limited experience when it comes to identifying, redesigning and scoping significant changes within your Cerner technology solutions?

If your answer is yes, it's time to partner with HPG. Our expertise in all Cerner solutions enables us to provide hands-on support and strategic guidance to maximize the capabilities of your entire Cerner system – which in turn drives stronger performance across the enterprise.
